

COMPANY PROFILE

Jiangsu Yourshine Group, founded in 1996 and located in Changzhou, Jiangsu, China, owns Jiangsu Yourshine Technology Co., Ltd., Jiangsu Yourshine Intelligent Equipment Co., Ltd., Jiangsu Yourshine Energy-saving and Insulation Equipment Technology Co., Ltd., specializing in cold storage insulation and energy-saving materials manufacturers and cold storage insulation and energy-saving solution engineering service providers. Over the years, we have solved various insulation construction solutions for cold storage for customers. The "Yourshine" brand has been deeply rooted in the hearts of the people, and is more and more trusted by people in the industry and occupies a certain market share.

DEVELOPMENT HISTORY

1995
The company was established, focusing on the field of insulation engineering

2006
Invested in the construction of a hook insulation board factory

2013
The output of hook plate is the first in China

2014
Won the high-tech industry

2015
The foundation stone of the new plant was laid

2016
Invested in the first KraussMaffei fully automated production line

2018
Obtained professional contracting qualifications for mechanical and electrical installation engineering and waterproof, anti-corrosion and insulation

2019
Investment in a second fully automated Krauss-Maffei line

2021
The annual output value is 3.8 million square meters, ranking first in the country

2021
Invested 150 million yuan to establish "Jiangsu Yourshine Technology Co., Ltd."

2022
Established "Jiangsu Yourshine Intelligent Equipment Co., Ltd."

2023
Established "Jiangsu Yourshine Energy Saving and Insulation Equipment Co., Ltd."

2023
Won the bid for the 200 million yuan insulation centralized procurement section of Yuhu cold chain

2024
Deploy a group business model

YOUR SHINE GROUP

ONE-STOP SOLUTION TO ALL KINDS OF COLD STORAGE INSULATION CONSTRUCTION SCHEMES

JIANGSU YOURSHINE INTELLIGENT EQUIPMENT CO., LTD

2024

PRODUCTS & SERVICES

1、Jiangsu Yourshine Refrigeration Equipment Group Co., Ltd

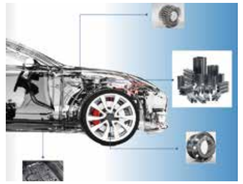

It is mainly engaged in the production, sales and installation of cold storage insulation boards, and its products cover various types of insulation boards such as PUR, PIR, rock wool, roofing, and exterior walls. Involved in many industries: cold chain logistics, food processing workshops, edible fungi, etc., to solve various cold storage insulation construction schemes. It has been ranked first in the national sales list for three consecutive years

2、Jiangsu Yourshine Technology Co., Ltd

Modern aluminum profile manufacturing enterprises, mainly aluminum profiles for construction and insulation engineering, rail transit, new energy vehicles aluminum profiles. Photovoltaic green power and other high-quality aluminum products, set aluminum alloy design, mold manufacturing, aluminum extrusion, surface treatment and precision machining one-stop science and technology enterprises

3、Jiangsu Yourshine Intelligent Equipment Co., Ltd

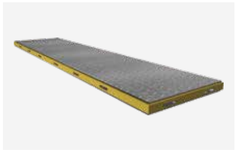

Focus on the research and development, production, sales and installation of various types of cold storage doors involved in cold storage. The main products are various types of cold storage with translational insulation doors, casement insulation doors, free doors, fast rolling shutter doors, industrial lifting doors, loading and unloading platforms, etc.

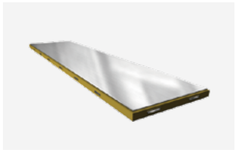

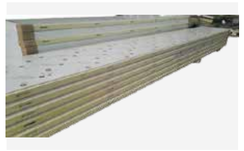

4、Jiangsu Yourshine Energy Saving Insulation Equipment Co., Ltd

Hook board for sales of small cold storage, suitable for small cold storage of chain supermarkets, major e-commerce platforms, etc. It has the advantages of flexible size and easy to build.

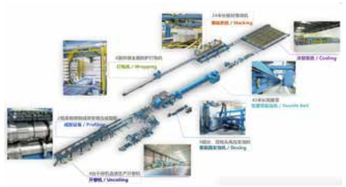

ADVANTAGES

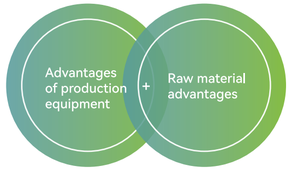

Advantages of production equipment

Two fully automatic continuous production lines in Germany KraussMaffei with the most complete functions in China, which can produce 24 hours a day, and the length of the double-track foaming machine is 43 meters.

Raw material advantages

Polyether polyol (white material) is a well-known domestic manufacturer of composite polyether, the quality of composite polyether is stable, especially in the pentane foaming system, the mixed type of modified polyether and black material and the compatibility with pentane are very good. Polyisocyanurate (black) PM-400 has high functionality, which can improve the isotropic uniformity of the bubbles, improve the dimensional stability and compressive strength of the foam, and improve the flame retardant properties of polyurethane and polyisocyanurate foams.
Blowing agent: Chambroad Chemical pentane foaming agent, the compressive strength of the foaming agent is good, the plate produced is not easy to shrink, the percentage of pentane reaches 98%, the purity is high, and the performance is more stable
